

SHOES - FIND YOUR PERFECT FIT

Measuring Your Feet In Three Basic Steps:

1. Put a piece of paper on the floor, place your foot on it and then draw two marks (heel and toe).
2. Measure the length of the foot, from the finger longer (usually the big toe) up to the back of the heel.
3. Compare the measurement thus obtained (in cm) with the dimensions of shoes and identify the EU number that comes closest.

MAN SHOES
