

Size Chart

We always try our best to accommodate pets of any breed and size, but our favourite furbabies come in all kinds of unique size and shape! So please be sure to measure your pet's sizing (then check and double-check!) before making your size selection.

Here are some tips on measuring your pet:

Keep in mind which product you are measuring for. For Harnesses, Step-in Harnesses and Collars, you'd want the fit to be snug (but not too tight that it would make your pet uncomfortable). For Apparel items, usually, a little room for them to move is better.

If you find that your pet is in between sizes, go for the larger size! This way you will have room for growth or an increase in coat thickness.
